PROFESSIONAL SUMMARY

Frontend Developer with hands-on production experience building scalable, user-centric web applications serving 10,000+ active users. Experienced in developing production-ready frontend applications, integrating REST APIs, and delivering scalable solutions for fundraising platforms, AI-driven applications, and real-time bidding systems. Strong expertise in React.js, Next.js, Vue.js, TypeScript, reusable UI components, API integration, responsive web design, and Server-Side Rendering (SSR).

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js, HTML5, CSS3

Languages: JavaScript (ES6+), TypeScript, SQL

Styling: Tailwind CSS, Responsive Design, Mobile-First Design, Cross-Browser Compatibility

State Management: Redux Toolkit, Context API

Performance: Server-Side Rendering (SSR), Lazy Loading, Code Splitting

API & Networking: REST APIs, API Integration, Axios, WebSockets

Developer Tools: Git, GitHub, Vercel, Webpack, Vite, Chrome DevTools

EXPERIENCE

Frontend Developer

June 2024 – Present

Molitics ([molitics.in](#))

Delhi, India

- Developed a responsive 4-stage Fundraise Platform using Vue.js, Next.js, Tailwind CSS, and REST APIs, supporting 10,000+ active users.
- Built responsive frontend modules for **Yara AI** by integrating AI-driven workflows, REST APIs, and reusable UI components.
- Designed and developed the frontend for the **M Store** application using Vue.js, REST APIs, WebSockets, and reusable UI components, enabling a seamless real-time bidding experience.
- Refactored legacy frontend code into reusable, modular UI components, improving maintainability, scalability, and frontend performance.

PROJECTS

Molitics Platform Migration | *Next.js, Redux Toolkit, REST API, SSR*

- Migrated a legacy frontend application to **Next.js** using Server-Side Rendering (SSR) and **Redux Toolkit** for scalable state management.
- Developed an API-driven social feed featuring posts, likes, comments, follow/unfollow, and trending functionality using Redux Toolkit and REST APIs.
- Developed an AI-powered leader comparison feature enabling side-by-side profile analysis using dynamic API data.

IPL Stats Tracker | *HTML5, CSS3, JavaScript, Client-Side Search*

- Developed a responsive IPL statistics application with client-side search, filtering, and optimized rendering using JavaScript.
- Structured the application for seamless migration from static JSON data to live REST API integration.

EDUCATION

Master of Science (M.Sc.) in Computer Science, Chinmaya Degree College

2020 – 2022

Bachelor of Science (B.Sc.) in Computer Science, Chinmaya Degree College

2017 – 2020

Diploma in Mechanical Engineering, UBTER University

2013 – 2016
